

## CUPIDS KISS ~ JUST PURE LIPSTICK

INGREDIENTS: castor seed oil, jojoba seed oil, candelilla wax, shea butter, beeswax, vitamin E, carmine, titanium dioxide, zinc oxide, mica, iron oxide, essential oils. 100% FREE OF IMPURITIES AND CHEMICALS

When you buy commercially produced Lipstick you are eating:

- COAL TAR,
- PETROLATUM,
- and even LEAD!

These toxins are absorbed into your body through your skin. Toxins are present in all commercially produced lipsticks, no matter how much you pay for them.

### ESSENTIAL OILS

*Castor Oil* comes from the castor seed, *Ricinus communis*. Because of its unusual chemical composition, it is responsible for its unique healing properties.

*Jojoba Oil* is technically not oil but a liquid wax. The chemical structure of Jojoba resembles sebum, which makes it helpful in cases of acne as it dissolves sebum. It is very balancing and useful for all skin types.

*Bees Wax* does not have the ability to penetrate the outer layer of the skin thus making it a very beneficial ingredient for sealing moisture into the skin. It also is a naturally nourishing moisturiser as well as being anti-inflammatory, antibacterial, and anti-allergenic.

*Candelilla Wax* (naturally occurring from the Candelilla shrub) effective anti-inflammatory treatment for skin disorders and other skin allergic reactions.

*Shea Butter* soothes and softens dry, chapped skin, while nourishing all skin types.

*Vitamin E* is an antioxidant and protecting the skin from damage caused by ultraviolet rays.

*Titanium Dioxide* is a naturally occurring oxide from the mineral ilmenite. It is soothing to the skin & a great sunblock.

*Mica's* are non-toxic occurring naturally from the minerals muscovite and silicate.
